DTH HAMMERS & BUTTON BITS

'LOTUS' DTH HAMMERS

The 'Lotus' Fast Forward Series DTH Hammers have been developed after extensive research with choice of shanks of all popular and leading DTH Hammer models that are preferred all over the world, which ensures best quality giving hammers longer life with less need of maintenance, less wear and tear, thus giving the end user more drilling meterage and optimum performance and more income being economical. The 'Lotus' Hammers are heavy duty and are available in sizes range of 4" to 10" diameters.

Lotus' brand Fast Forward series state of art DTH Hammers and other popular brand DTH Hammers manufactured by us, give a wide range of other benefits to the users, as they are built with valve less technology, thus the performance is extremely good & reliable. 'Lotus' hammers incorporate the facility of lubricated bit shanks to ensure splin wear to least. The facility of reversible piston casing and simple & rugged construction ensures extended service life and easy maintenance with less wear & tear and low operational costs.

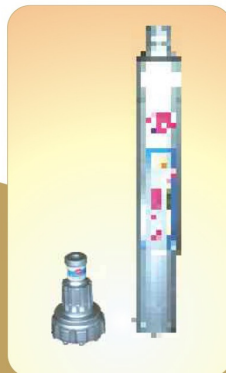

'Lotus' hammers, combined with the best quality of compatible Button Bits, will give users an excellent drilling capacity & good productivity by minimizing their total drilling costs. Borehole drilling in water well & Blast holes in mines, quarries and civil construction are applications that will benefit the users less drilling costs thus enhancing their profits.

'LOTUS' BUTTON BITS

'LOTUS' DTH (down the hole) Button bit are available in different sizes ranging from 3" to 14" with all international shank designs to suit different application. To give peak penetration in water well drilling as well as blasting holes for mining / construction industry, 'LOTUS' Button Bits are made from the best of the alloy steel, machine to high precision and heat treated with most advanced **heat treatment Carburizing technology**. The carbide buttons are procured from leading reputed indigenous manufactures having the latest international in making tungsten carbide buttons. Quality and durability are essential requisites for all rock drilling tools and equipment, 'LOTUS' button bits are manufactured under strict quality control and by most skilled force for proven and guaranteed satisfaction to the customer. 'LOTUS' Button Bit designs have been perfected from the most extensive rock drilling experience.

QUALITY POLICY

'LOTUS' HAMMERS & 'LOTUS' BUTTON BITS are produced by choosing right raw material, high technology in machining and heat treatment facilities made available in-house under one roof, with stringent & vigilant quality control checks at every stage of manufacturing process. Thus it is ensured that every hammer & button bit that goes to warehouse/stock is perfect in quality & free of any defects.

DTH HAMMERS (Valve-less Hammers) FF (FAST FORWARD) SERIES HAMMERS

BUTTON BITS FOR ALL TYPES OF HAMMERS

We supply Button bits of all types & sizes for Leading International Brand models of hammers and also we can manufacture bits for any make of hammers with exact specifications and material property as per client's sample in any bulk or small quantity at very good prices.

We undertake job works of all spare parts of DTH Hammers as per engineering drawings or physical samples provided by clients
