## About Us

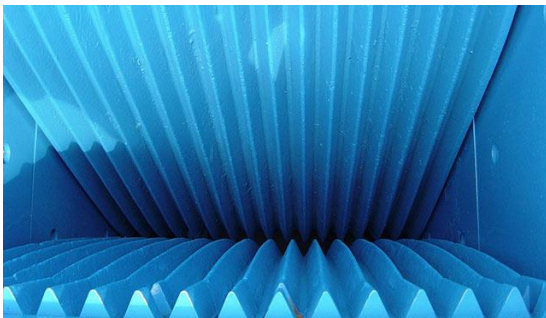

Kamal Import Exports Inc is an Import Export oriented business house promoted and founded by Varma group of companies who have a vast experience and knowledge of different business activities and have links with several family owned and related businesses. The line of business activities include export of Spare Parts of Crusher, Rock Drilling Tools & Equipments for Quarry, Mines and Water Well Drilling Applications, Construction Machinery & Spares, 'Lotus brand DTH Hammers & Button Bits, 'Lotus brand Rigid PVC (uPVC) Pipes & HDPR Pipes, "ULTRA" make Concrete Mixers, Diesel Generators with "Cummins" Engines, Air Compressors for quarries, Industrial application and Water well drilling Rigs, Conveyor Belts, Wire Mesh / Screens, Engineering Products & Machinery, Consumables & General Merchandise, Agro based commodities like Grapes and Onions.

The company has been **Exporting Spare Parts for Crusher** for a long time, produced to international standards and specifications. **The manufacturing range includes 'Lotus" brand Rigid PVC & HDPE Pipes. Also 'Lotus" brand DTH Hammers & Button Bits for mining blast hole & water well drilling applications.** The company several sister concern companies who are manufacturing construction machinery such as hydraulic Vibrating Road Rollers, Static Road Rollers, Jaw Crushers, Impact Crushers, Vibrating Feeders, Vibrating Screens, Conveyor Systems, Concrete Mixers, Tower Hoists, Excavators etc. and All types of allied equipments. It is our company policy to emphasize on providing best international quality products to our overseas buyers at most reasonable rates within the stipulated delivery period. We can supply all above-mentioned products of best quality manufactured by reputed companies & ISO-9001 companies and OEM suppliers who supply and export these products to manufacturers in domestic and overseas markets. The company has been in this line of business since 12 years and has been doing business with more than 32 countries spread in Asia, Africa, Gulf, Europe, USA & Australia, the world over. The company has got substantial technical staff having expertise in different fields and Products in which the company deals for quality control during the procurement and packing, Process. The turnover of the company is about 250 million Indian Rupees. The main motto and policy of the company is to provide its customers / client's world-class products and services quality wise and cost wise within time binding period. Due to this policy only the company has been gaining business from its buyers and clients spread globally.

### ALL TYPES OF SPARE PARTS FOR CRUSHERS.

Available with us is a wide range of Crusher Spare Parts for the customers. These spare parts are widely demanded in the market for their efficient ability to crush the solid particles and convert them into a powdered form. Further, material crushed by these products is used for construction purposes. We test these products on certain well-defined parameters before their dispatch to the clients' end.

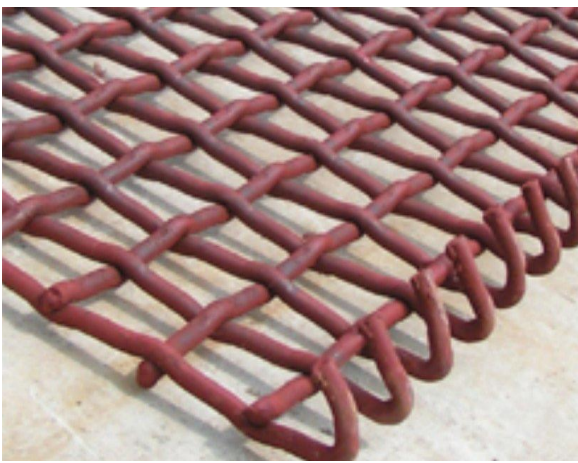

## Jaw Plates

The bottom of the pitman is supported by a reflex-curved piece of metal called the toggle plate. It serves the purpose of allowing the bottom of the pitman to move up and down with the motion of the eccentric shaft as well as serve as a safety mechanism for the entire jaw.

## Bearings

Large Diameter Roller, Needle and Ball bearings for Crushers – Body and lever (pitman), robust and heavy duty to give best performance and life. As well as all types of bearings of difference makes a feature of great accuracy ratio, uniform size of fineness, easy maintenance and less operating cost. Suitable for all applications in machines and equipments, Gear Boxes, Conveyor Drums, Rolls, Idlers and many more general purpose application.

## Woven Wire Mesh/Screen & Other Wire Products

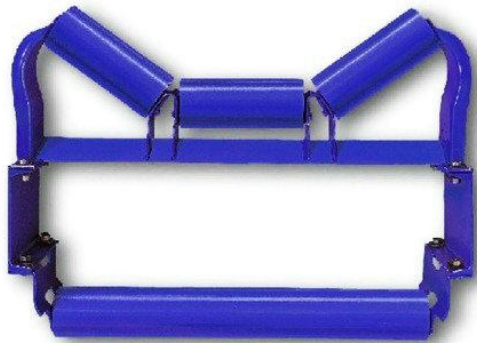

Woven wire mesh screens made out of high tensile steel (Spring Steel- Grade) manufactured to suit individual requirement and specifications of steel grade, wire dia, Mesh aperture sizes, length & width, plain ends, ends with hooks, bent ends etc., specially for aggregate industry, quarries and mines. Also available fine mesh in stainless steel and Other metals.

## Conveyor Belts & Conveyor Systems

Reliable and heavy-duty conveyor belts in 2/3/4/5 ply quality with M- 24 in grade, Nylon and EP type Belts, for application in Quarries, Mines and construction / Aggregate Industry. We can also supply custom made conveyor system tailored to specific requirement of clients.

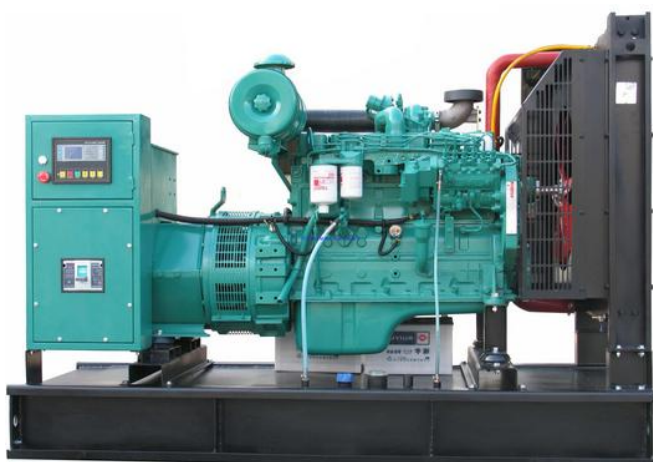

## Idler Rolls & Return Idler Rolls for Conveyor Belt System

Reliable and heavy duty Idlers and Rolls for Replacement and trouble free maintenance.

## Feeders, Vibrating Screens & Storage Hoppers

Reliable and heavy-duty quality equipments in all sizes and specifications to suit existing capacities of your stone crushing plants

## Generator Sets

Cummins & other brand best International quality heavy-duty Diesel Generator sets fitted with brand new brand diesel Engines and Stamford brand Alternators having output capacity from 20 KVA to 2000 KVA. Suitable for heavy usage in industries, factories, hospitals, super markets, schools, colleges, commercial establishments and domestic applications to fulfil needs of power

## Pneumatic Crawler & Wagon Drill

Best quality International brand Drilling Rigs for use in Quarries for Blast Hole Drilling application, with backed up services for after sales spare part supplies for regular maintenance.

## Air Compressors & Spare Parts

Best quality International brand Portable Air compressor for use in Quarries for Blast Hole Drilling application, with backed up services for after sales spare part supplies for regular maintenance

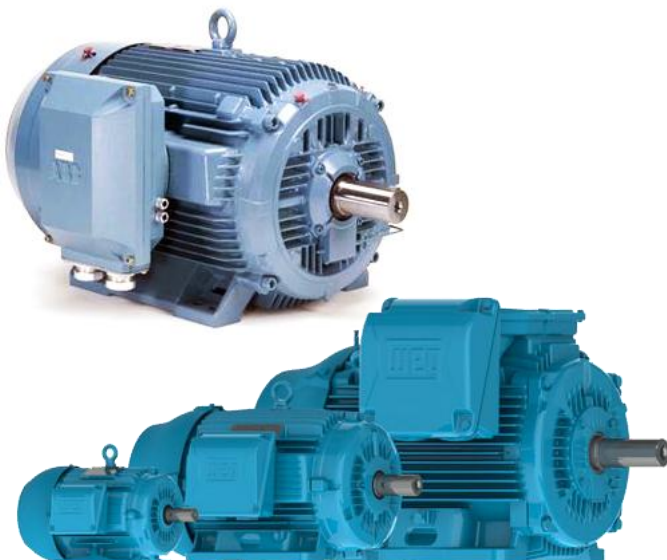

## Belt Fasteners, General Nut Bolts & Washers

## Reduction Gear Boxes

Reliable and heavy-duty Gear boxes to cope up needs of speed controlling systems in crushing plants to run material handling equipments conveyor belts.

## Electrical Motors

Reputed and trustworthy leading brands of Electrical motors in single and 3 phase, with all ranges of current capacity requirements from low to high voltage are available to cater to needs of power requirements crushing plants with various equipment to run the entire plant with minimum maintenance and minimum break down times with reliable working and back up.

## Rock Drilling Tools & Equipments

**DTH HAMMERS & DRILL BITS FOR USE IN QUARRIES FOR BLAST HOLE DRILLING APPLICATION.**

**DTH HAMMERS:** 'Lotus' brand Heavy duty and Reliable Valve-less and Valved DTH Hammers from 3.5" to 10" Diameter with most popular International shank designs compatible Atlas Copco, Ingersoll Rand, Sandvik Drilltech Mission etc, meeting international quality standards & specifications.

**BUTTON BITS & TRICONE ROCK BITS:** 4" to 20" Dia button bits compatible to for all major International brand DTH Hammers back up.

## Shaft Mounted Gearboxes

Shaft mounted gear box are widely used in conveyors in crushing plants in mining and quarry plants. Gearbox are totally enclosed and consist of hardened & precision machined alloy steel gears mounted on highly finished shafts supported on long life bearings of capacity to take maximum load. Shaft mounted gear box are widely used in conveyors in crushing plants in mining and quarry plants. Gearbox are totally enclosed and consist of hardened & precision machined alloy steel gears mounted on highly finished shafts supported on long life bearings of capacity to take maximum load.

## Duplex Chains

Reliable and heavy-duty chains in various sizes and pitches, suitable to corresponding sprockets to meet various speed ratios and movements in material handling in a crushing plant.

## Duplex Sprockets

Sprockets are equipment that finds their use in numerous purposes for easy operating of machineries. Teamed using the right type of chains, they are integral for greater productivity.

## HYDRAULIC HOSES, PNEUMATIC HOSES & END FITTINGS

Best reliable quality Hydraulic Hoses for High Pressure and low pressure applications to suite all needs and requirements, with all types of end Fittings, in all sizes and Lengths suitable to client needs. Also available Hoses for Pneumatic / Air Application needs in quarries with air compressors and in workshop needs.

## V Belts & Timing Belts

Crusher transmission is a common drive way, which belongs to the flexible friction drive, by using the v-belt torque to change the rotate speeds. All types, in all sections and grades

## Welding Machines, Rods & Consumables

Increase the lifetime of many different types of crushers used in the primary and secondary crushing processes. Decrease cost of maintenance in these processing areas.

## OILS & GREASES FOR ENGINES & GEAR BOXES

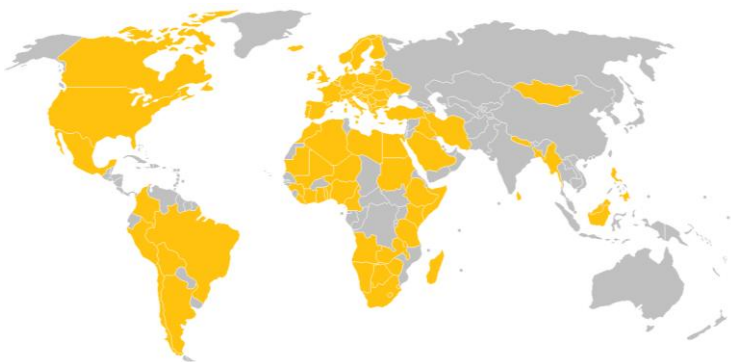

# HAND TOOLS & EQUIPMENT FOR WORKSHOP & TOOLS ROOMS

## QUALITY ASSURANCE:

It is our Motto & Humble Policy to provide best quality products to our overseas buyers and clients at most reasonable rates & within the stipulated delivery time. We supply all abovementioned products manufactured by reputed companies and OEM suppliers who supply and export these products to manufacturers in domestic and overseas markets.

**EXPORTING TO MORE THAN 32  
COUNTRIES SINCE MORE THAN  
13 YEARS**
